x**FormServer**©

AcroForm Compatible PDF Demonstration Form

This form demonstrates some of the capabilities of xFormServer© to automatically process highly compatible AcroForm PDF forms using the free Adobe Reader, without needing the form to be Reader Extensions enabled.

This PDF form has been designed using Adobe Acrobat Pro, but many other vendors also offer AcroForm design tools.

This is a standard PDF AcroForm the same as you can design yourself; the only difference is it contains 6 hidden xFormServer© fields which allow the form designer to determine the table(s) to which the forms' data will be saved, and automatically send the users of the form a submission receipt with an Adobe Reader compatible copy of their form by eMail.

Please try it out. Fill in some information, your eMail address is required so that you can receive the Reader compatible read-only completed form back, then click the 'x**FS** Submit Form' button at the bottom of the form.

If you would like more information, or to try xFormServer using one of your own PDF forms, please click this link - sales@xDox.co.uk.

Adobe, Adobe Reader, Adobe Acrobat & LiveCycle are registered trade marks of Adobe Systems Incorporated.
